Material

bthaüs' sanitary ceramics are sustainably manufactured using natural materials. This premium quality material is then fired up at 1200 °C to meet the highest requirements in durability and hygiene. Additionally, different glazes, such as, CeramicPlus and AntiBac, are added to the sanitary ceramics to ensure antibacterial protection and dirt-repellent surfaces.

- This premium quality material is used to craft all bthaüs' washbasins, toilets and bidets.
- Highly resistant to knocks, scratches and impacts.
- Durable and hygienic, due to the additional glazes

Product Type

This water closet is directly mounted on the bathroom wall, where, although the flush plate remains visible, everything else, including the cistern, is concealed in the pre-wall installation. Making it easy to keep the floor beneath the toilet clean in a bathroom that gives off a modern feel.

Benefits:

- Model is primarily available as washdown pans
- Easy Installation
- Water cistern is built into the bathroom space
- Minimizes odors
- Suitable for numerous drainage solutions

Cleaning and Care

bthaüs' sanitaryware is generally resistant to household acids and alkalis, therefore, a simply damp cloth will suffice for daily care. Bathroom cleaners are ideal for water marks, residual grease, soap and limescale deposits. For tough stains, CERAMIC The modern classic Ceramic 5 Particular is recommended for residue or stains containing high amounts of fluorine. For even tougher stains or residues, a non-abrasive liquid or cream bathroom cleaner, with a soft sponge will do the trick.
